

# Finally – a quick, responsive supplier with reasonable pricing, who delivers parts and paperwork accurately

If you're frustrated by the high minimums, long lead times and overall indifference of aerospace suppliers, try us.

We're a caring supplier who's invested heavily in technology to make it easy for you to do business. We answer phones quickly. Follow up quickly. And satisfy your needs quickly.

That's why we're approved by companies like Lockheed Martin, Raytheon, Aurora Flight Sciences, Rexnord, UTC Aerospace Systems, and General Dynamics.

We're also AS 9120 and ISO 9001:2008 certified.

## Low minimums; FREE mfg certs

So try us. It won't cost you a lot since our low minimums are \$10/line and \$20/order.

As a bonus, manufacturer's certs are FREE!

Plus you can depend on complete, accurate test reports and other paperwork since we use electronic imaging to link all documents to our parts. So if you misplace paperwork, we simply fax or email replacements, quickly. Online access to your certs is also available.

## Specialists in hard-to-find items and packaging

Stop wasting time on hard-to-find parts. We specialize in locating obsolete and hard-to-find parts, and in cross-referencing. From unique sizes, to exotic materials, to non-standard finishes.

Special packaging is another of our skills. So whether you require one part per sealed bag or two different parts in the same bag, just ask.

## Custom VMI services

And if you're short on time or help to manage your supplies, we can do it for you. We've been installing and running custom bar code-based VMI systems for over 23 years.

Ready for quick, responsive service from a caring, accurate supplier? Contact us today.
